Summary

Detail-oriented Computer Engineering graduate pivoting to **Data Analysis**. Strong foundation in **SQL, Python, and Excel**, leveraging a background in full-stack development to understand data structures and backend logic. Proven experience in optimizing data retrieval and analyzing system requirements as a Team Lead. Eager to apply technical problem-solving skills to uncover business insights as a Junior Data Analyst.

Skills

Data Analysis: SQL, Microsoft Excel (Pivot Tables), Power BI, Python (Basics).

Programming: Python, SQL, JavaScript.

Core Competencies: Data Visualization, Database Management, Problem Solving, Agile Methodology, Git.

Experience

Full Stack Developer (Team Lead), The Special Character – Ahmadabad, Onsite May 2024 – June 2024

- Spearheaded a team of developers, **analyzing project requirements** to design efficient data flow structures for web solutions.
- Optimized database queries and backend integration, resulting in faster **data retrieval speeds** and improved system performance.
- Managed project timelines and resource allocation using agile methodologies, ensuring data accuracy and on-time delivery.

Front-End Developer, Infoxors – Gandhinagar, Onsite April 2025 – July 2025

- Collaborated with backend teams to ensure accurate **data rendering** and validation on user interfaces.
- Analyzed user feedback data to identify bottlenecks, debugging logical errors to improve application stability.
- Managed API integrations, handling JSON data parsing and ensuring seamless data transfer between client and server.

Projects

E-Commerce Data Backend (Full Stack)

- **Tech Stack:** PostgreSQL, Node.js, Data Management
- Designed a **relational database schema (PostgreSQL)** to manage complex inventory data, orders, and user profiles.
- Optimized SQL queries for efficient data storage and retrieval, ensuring data integrity across the platform.
- Analyzed transaction flows to implement robust logic for cart management and payment processing.

EventMate – Booking System Architecture

- Structured logical data models for user profiles and event categorization to optimize the search and booking experience.
- Analyzed user requirements to create systematic workflows that reduced friction in the data entry process.

Weather Forecast Dashboard (API Data)

- Built a data-driven dashboard that fetches and parses real-time datasets from the OpenWeatherMap API.

- Implemented JSON data handling to visualize forecast metrics accurately across different devices.

Education

LDRP Institute of Technology and Research, B.Tech in Computer Engineering 2021 – 2025

- CGPA: 6.85

Aradhana Vidhyavihar, H.S.C (GSHEB) May 2021

- Percentage: 77.69

Certifications & Achievements

- **HackerRank SQL (Basic)**: 5-Star Badge in SQL (verify at hackerrank.com/siddhpatel713).
- **C Programming Certification** (Great Learning).
- **NCC Cadet**: C Certificate (Bravo Grade) – Leadership and Operations.
- **Sports**: National-level Handball player.

Languages

- English, Hindi, Gujarati
